

Litigation & Arbitration Support

Forward Risk's litigation and arbitration support practice thrives on the firm's proven track record as an active and reliable partner to attorneys and other legal professionals. Our investigative services have helped attorneys rebut their opponents' legal arguments, discredit their witnesses, and change the narrative with newly revealed facts.

We pride ourselves not only on an intimate understanding of the time-sensitive, detail-oriented nature of litigation and arbitration, but a tested and demonstrated ability to adjust rapidly to the ever-changing requirements, deadlines, and objectives of actors in the legal sector.

As investigative specialists, Forward Risk's team can handle labor-intensive research in a structured and efficient manner. By partnering with Forward Risk, legal teams are able to direct their energy and resources to other critical priorities.

How We Help

▶ **Developing impeaching information**

Forward Risk uses open-source investigative research and, as appropriate, human intelligence gathering to reveal potentially discrediting information about opposing parties, witnesses, and others.

▶ **Tracing assets**

Whether seeking to enforce a judgment, or determining if a suit is worth pursuing, attorneys rely on Forward Risk to build a profile of a target's real estate holdings, vehicles, securities, and other assets, using available legal and ethical means.

▶ **Relationship mapping**

Equipped with findings from investigative research, we connect the dots using a careful, step-by-step approach toward uncovering links and associations that help advance attorneys' legal strategies.

▶ **Defensive vetting**

Forward Risk helps attorneys anticipate and rebut lines of argument that opposing counsel may use in the course of litigation. Our research into parties and witnesses helps to uncover potential vulnerabilities and present them in a nuanced way.

▶ **Intellectual property (IP) investigations**

Through a variety of bespoke investigative services, Forward Risk conducts fact-finding operations related to allegations that a company's patents or trademarks have been infringed.

Our Experience

▶ **Litigation Support Research Uncovers Former Public Official's History of Corruption**

At the request of a law firm representing aggrieved parties in a DWI case, Forward Risk investigated the defendant, a public official, and successfully uncovered a history of corrupt behavior. The law firm described the findings as "incredibly helpful," having confronted the defendant with this track record during a deposition.

▶ **Crafting a Defense Strategy against Insider Trading Allegations**

Forward Risk was tasked with assisting a white-collar criminal defense attorney regarding insider trading suspicions against their client, a Middle Eastern businessman. Using local-language research and a bespoke investigative strategy, we developed an argument that the investment transaction in question required no insider knowledge and was in line with prevailing market expectations. Client counsel was able to use these findings to craft an effective defense strategy, and no charges were ultimately filed.

The Forward Risk Difference

The Forward Risk team is a close-knit group of star performers dedicated to excelling in the investigative profession. We have diverse backgrounds but a shared commitment to providing industry-leading services, reinforced through the firm's extensive investments in knowledge sharing, training, and professional development. Our success comes from the intelligence, creativity, experience, sophistication, and tenacity of our investigators.

We listen to our clients. We don't try to shoehorn a complex investigation into a pre-defined package that can be mass-produced. Through understanding each client's concerns and goals, we tailor our research and our reporting to what is most actionable.

We devote time, resources, and care to our work. Where other firms may pressure investigators to prioritize speed over quality, we are absolutely committed to thoroughness, depth, accuracy, and proper analysis. This is how we build strong and long-lasting relationships with our clients.

Who We Are

Forward Risk is a corporate investigations, intelligence, and risk advisory firm that provides tailored investigation and litigation support, investor due diligence, and strategic intelligence services. Our unique approach combines well-honed industry savvy with bespoke reporting to deliver value-driven information tailored to meet complex client needs. Staffed by a diverse team of professionals including former attorneys, investigative journalists, intelligence community alumni, and other government affairs experts, we help clients navigate transaction and dispute lifecycles by providing investigation and litigation support, investor due diligence, and strategic intelligence services.

We marry comprehensive rigor to the curation of narrative context, which ensures that our clients receive actionable intelligence in the unique context of their specific engagement and objectives.
